**Ambient Devices Announces Two Color Changing Devices,  
*Cirrus* 7-Day Weather Forecaster and *Centerfield* Baseball ScoreCaster,  
Available at Best Buy**

*Innovative Color Changing Dial Provides Up-to-Date Information, At a Glance*

**Cambridge, Massachusetts - (October 27, 2009)** – Adding to their line of products that provide “information at a glance,” Ambient Devices today unveiled the new ***Cirrus*** 7 Day Forecaster and ***Centerfield*** Baseball ScoreCaster. Designed to provide easy access to frequently checked information, *Cirrus* and *Centerfield* deliver up-to-date information on a unique, large and easy-to-read display. Just in time for the holidays, *Cirrus* 7-Day Forecaster and *Centerfield* Baseball ScoreCaster are available at Best Buy.

*Cirrus* provides weather updates from AccuWeather.com for over 150 U.S. locations. *Cirrus* receives data from the free Ambient InfoCast™ Wireless network. No PC, Internet, or WIFI connections are required. *Cirrus* delivers up to date high and low temperatures, wind speed and direction, precipitation, UV index, and even pollen & air quality updates.

As the temperature changes so does *Cirrus*. “With the color-changing dial feature *Cirrus* gives you the temperature instantly, even from across the room. As the temperature varies, *Cirrus* changes its dial color to reflect the weather outside,” said Andrew Boch, VP, Ambient Brand. “Ambient provides easy accessible information at a glance, with no setup in a clean, crisp, and stylish device. You’ll never wait to the top of the hour for a weather report again.”

***Cirrus* features:**

- Large, easy-to-read icons show the AccuWeather.com forecast, including high/low temperature, current temperature, and trend.
- Provides precipitation, wind speed & direction, UV index, pollen and air quality alerts.
- Color changing dial feature provides current temperature at a glance, even across the room.
- Favorites button for instant access to up to 5 locations, dimmable back lit screen and adjustable kickstand for easy viewing.

*Centerfield* automatically receives scores, schedules, and standings for every major league baseball team, from spring training to the fall classic. *Centerfield* works right out of the box without any setup. Simply plug it in (an AC adaptor is included) and receive updates in minutes.

The unique color-changing dial corresponds with your team’s game status. “Centerfield is the diehard baseball fan’s best friend. Get all the info you need at a glance, while at work or at home” says Boch. “From Spring Training to the World Series, Centerfield always knows the score and never misses an inning, all season long.”

**Centerfield features:**

- Automatically receive scores, schedules, and standings for every team and every game, from spring training to the Fall Classic.
- Dial color glows green when your team is winning, red when they are behind, and yellow if it's a tie ball game.
- Displays starting pitchers, home/away status.
- Great way to keep up with afternoon games at work, and to track multiple games in progress without waiting for radio or TV updates

Cirrus (\$149.99) and Centerfield (\$129.99) are available now at Best Buy.

**About Ambient Devices**

Ambient Devices delivers information at a glance™ to dedicated displays, without a PC or internet connection. The Company's technologies enable instant, effortless access to frequently updated information, such as weather forecasts, stock market activity, sports scores, and much more – with little or no user configuration. Ambient Devices was founded in 2001 to commercialize patent-pending technologies pioneered at the MIT Media Lab. The company is headquartered in Cambridge, Massachusetts, and is privately held.
